Profile

Results-driven Back-End Developer with hands-on experience in building scalable and dynamic web applications using PHP, Laravel, and Livewire. Proficient in designing robust database architectures, and implementing real-time features. Passionate about clean code, performance optimization, and delivering seamless user experiences through solid back-end logic and integration.

Professional Experience

Back-End Developer

08/2025 – Present

Data-Link - Kuwait

- Built and maintained scalable web applications using **Laravel** and **Livewire**.
- Developed **project management modules** with progress tracking, file uploads, and status-based filtering.
- Designed reusable **CRUD** systems using **modal-based** interfaces for clean admin UX.
- Implemented secure file upload and storage systems for invoices and tasks.
- Integrated **Firestore Cloud Messaging** (FCM) for real-time push notifications.
- Developed a **real-time** chat system using **Laravel**, **Reverb**, and **WebSockets**.
- Built and documented **RESTful APIs** for frontend and third-party integrations.
- Collaborated with the team using **Git** version control.

Back-End Developer (Remote)

04/2025 – 08/2025

Const-Tech – Saudi Arabia

- Built and maintained complex web applications using **Laravel** and **Livewire** for business operations and accounting
- Developed a **dynamic invoice management system** supporting tax, commission, partial payments, and automatic accounting entries
- Created a **real-time reporting module** for income and expense tracking, with date range filters and account tree aggregation
- Implemented **project management tools** with progress tracking sliders, file uploads, and status-based filtering
- Built **bank voucher and fund box systems** with support for internal and external accounts
- Designed reusable modal-based CRUD interfaces to enhance user experience and maintain a clean admin panel
- Integrated **file upload systems** for invoices, tasks, and projects with secure storage and preview features
- Worked closely with the team using **Git**

Education

Bachelor's Degree in Computer Science, *El Shorouk Academy* 📄

2020 – 2024

Grade: Good

cairo, Egypt

Skills

Languages & Frameworks:

- PHP (OOP), Laravel, Livewire, Filament
- JavaScript, HTML5, CSS3, Bootstrap

Core Concepts:

- Eloquent ORM, MVC Architecture
- RESTful API Development (API Resources, Authentication via Sanctum)
- File Uploads, Form Validation, Authentication & Authorization
- Component-based design with Livewire
- Artisan commands, Queue jobs, Performance tuning

Databases & Tools:

- MySQL, SQLite
- Git, Composer, Postman, Laravel Telescope, Laravel Debugbar

Soft Skills

- Problem Solving
- Communication
- Teamwork
- Adaptability
- Time Management
- Attention to Detail
- Continuous Learning

Projects

Course Generator (Graduation Project)

Streamlit + Python + ChatGPT API (OpenAI)

- Developed an AI-powered platform that generates educational content
- Features: AI Q&A assistant, video/audio/slides export, Google Drive integration
- Focused on simplifying complex subjects and improving accessibility

Income & Expense Reporting Tool

Laravel + Livewire

- Designed a reporting system that filters by account, description, and date range
- Built an expandable account tree showing real-time balances
- Included cumulative totals and printable reports

Project Tracker Dashboard

Laravel + Livewire

- Managed projects with status updates and progress tracking slider
- Enabled file uploads and filtering by project status and date
- Used modal-based CRUD design for seamless UX

Courses

PHP & Laravel Full Course – YouTube

- Covered fundamentals of PHP, OOP, MVC, and database integration
- Hands-on Laravel training including routing, Eloquent ORM, Blade templates, authentication, and REST APIs

Livewire Course – YouTube

- Built reactive Laravel components using Livewire
- Gained experience with real-time validation, nested components, and event-driven interfaces

Languages

- Arabic
- English
